

Product Datasheet

Description

Alubase® is a natural anodized slimline aluminum skirting range section designed for quick and easy finishing of plaster walls in commercial, industrial and residential applications. The SK100 is the adhesive fix, aluminum baseboard provides a flat and minimal look finishing off walls at floor level.

Installation Method

After fixing wallboard to stud wall, the Alubase baseboard should be fixed to the base of the drywall with an appropriate construction adhesive. This product is designed for taped and jointed walls and to be drywalled in with a jointing compound.

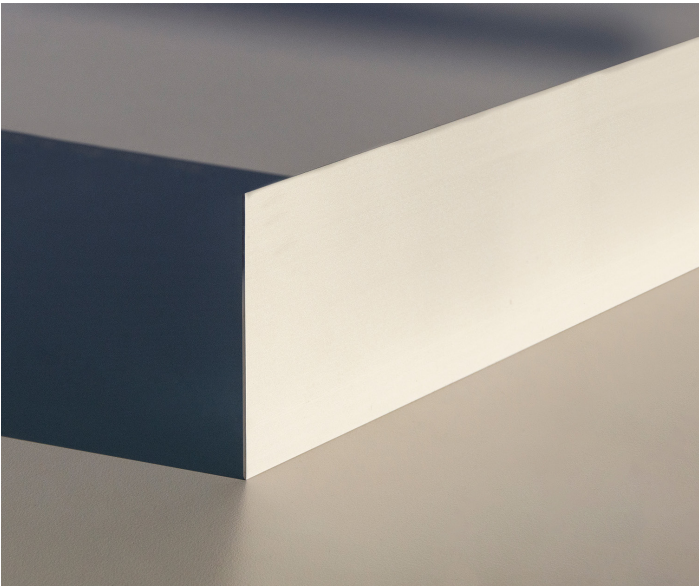

Finish

AluBase flat baseboard can be provided in anodised aluminium or prime powder coat finish.
